This training-workshop aims to empower educators, thesis advisers, and research panelists with advanced research competencies in response to emerging trends and innovations in scholarly inquiry. It will explore the ethical and effective integration of artificial intelligence in research teaching, literature discovery, methodological planning, data analysis, thesis supervision, research evaluation, conference presentation, and high-impact journal publication. Through this initiative, we hope to strengthen research quality, promote responsible AI use, and enhance the research capabilities of higher education institutions in Eastern Visayas.

In this regard, we would be grateful for your office's endorsement and assistance in disseminating the activity to higher education institutions in Region VIII, encouraging interested faculty members, research coordinators, thesis advisers, and research panelists to participate, subject to their respective institutional approval and availability.

We believe that CHED's support will help broaden the reach of this initiative and contribute to a stronger culture of ethical, innovative, and internationally competitive research in the region. Attached are the activity details and advisory for your reference and consideration.
