Trends and Best Practices in Research Teaching and Thesis Advising: Integrating Innovative Pedagogy, Smart Technology, and Generative AI *August 19-20, 2026 via ZOOM Teleconferencing*

A convergence of evidence-based pedagogy, smart technologies, and the ethical use of Generative AI, the contemporary academic landscape has redrawn the roles of research teachers and thesis advisers, demanding nothing less than a fundamental reimagining of what it means to teach research and mentor students throughout their academic research journey. In this new research terrain, which prioritizes inquiry over instruction, collaboration over authority, and competence over compliance, the research teacher is no longer merely a lecturer on methodologies or an evaluator of outputs, but a cultivator of curiosity, critical thinking, creativity, scholarly communication, and research integrity. The thesis adviser, likewise, has outgrown the narrow role of manuscript supervisor. Instead, the adviser serves as a mentor who guides students through the ambiguities of research, nurtures intellectual independence, and helps transform academic requirements into scholarly contributions worthy of publication and meaningful participation in the larger academic conversation. With the broader movement from teacher-centered instruction toward learner-centered, inquiry-driven, and competency-based education, how does one become a research teacher and thesis adviser capable of successfully mentoring students toward the completion, dissemination, and publication of high-quality scholarly research?

Developing future-ready research teachers and thesis advisers, the **Asian Society of Teachers for Research Inc.** invites you to the **Webinar on the Trends and Best Practices in Research Teaching and Thesis Advising: Integrating Innovative Pedagogy, Smart Technology, and Generative AI** on **August 19-20, 2026 via ZOOM Teleconferencing**.
